RESEARCH INTERESTS

Video Segmentation, Multi-modal Foundation Model Adaptation, 4D Perception

EDUCATION

Xiamen University (XMU) Sep. 2023 - Now
M.S., Artificial Intelligence Advisor: Prof. Xinghao Ding & Prof. Yue Huang

Fujian Normal University (FJNU) Sep. 2019 - Jun. 2023
B.S., Computer Science & Technology GPA: 3.83/4.0 Rank:(3/200)

SELECTED PUBLICATIONS&MANUSCRIPTS

Preprint (Ongoing): **Y. Huang**, K. Wen, R. Chen, etc. "`SAM3R: Language-Grounded Segment Anything Model for 3D Reconstruction`".

NeurIPS 2025 (Submitted) [page]: K. Wen*, **Y. Huang***, R. Chen, H. Zheng, Y. Lin, Z. Fan, Y. Huang, X. Ding, "`DynamicVerse: Physically-Aware Multimodal Modeling for Dynamic 4D Worlds`".

CVPR 2025 (Accepted)[page]: **Y. Huang***, C. Li*, H. Zhang, Z. Lin, Y. Lin, Y. Huang, X. Ding, "`Track Any Anomalous Object: A Granular Video Anomaly Detection Pipeline`".

NeurIPS 2024 (Accepted) [1] [page]: C. Li*, **Y. Huang***, W. Li, H. Liu, X. Liu, Q. Xu, Z. Chen, Y. Yuan, "`Flaws can be Applause: Unleashing Potential of Segmenting Ambiguous Objects in SAM`".

ACM MM 2024 (Accepted) [page]: **Y. Huang***, C. Li*, Z. Lin, H. Liu, H. Xu, Y. Huang, X. Ding, Y. Yuan, "`P`^{2}`SAM: Probabilistically Prompted SAMs Are Efficient Segmentator for Ambiguous Medical Images`".

PROJECT EXPERIENCE

Research on Intelligent Recognition and Detection in Remote Sensing (*Project leader*)

- Developed a high-precision recognition framework for remote sensing scenes using the **RSMamba**, improving classification accuracy across resolutions and enhancing robustness for diverse scenarios.
- Utilized the **Grounding DINO** model for few-shot and zero-shot detection of high-value targets, effectively addressing data limitations in remote sensing while maintaining detection performance.
- Optimized the **GeoChat** agent model for remote sensing tasks, enabling the generation of detailed and context-aware textual descriptions for comprehensive imagery analysis workflows.

SELECTED HONORS & AWARDS

- Huang Xilie University-Level Scholarship Mar. 2025
- University Level Outstanding Student Award Dec. 2024
- The First Prize Scholarship, Fujian Normal University Dec. 2022
- First Prize in the National College Students' Mathematical Modeling Contest Dec. 2022
- Meritorious Winner in the Mathematical Contest in Modeling (MCM), USA Nov. 2021
